## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of claims 1-10, 13, and 14 in the reply filed on 10 November 2005 is acknowledged. The traversal is on the ground(s) that the received data must have been transmitted in the manner described in claim 11. This is not found persuasive because received data isn't necessarily transmitted by the calculating agent. Further, the specification itself discloses several ways of checking the transmitted data (pages 6-7).

The requirement is still deemed proper and is therefore made FINAL.

2. Newly amended claims 1-10 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claim 1 was amended to add transmitting, which is non-elected subject matter. Accordingly, claims 1-10 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Information Disclosure Statement***

3. The examiner has considered the information disclosure statement (IDS) submitted on 26 October 2001.

### ***Oath/Declaration***

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:  
It does not include the inventor's signature.

### ***Drawings***

5. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

6. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 106 and 204. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

7. The disclosure is objected to because of the following informalities:

Page 1 line 13 has a misplaced comma.

Page 2 line 16 contains a grammatical error.

Page 4 line 11 contains a grammatical error.

Page 6 line 29 says comparison 302 instead of 305.

Page 6 line 34 says 306 instead of 307.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 recites the limitation "means for denying an authentication value". It is unclear how the authentication value could be denied. This limitation is being read as "deriving an authentication value", as supported in the specification, page 5 line 3.

***Claim Rejections - 35 USC § 101***

10. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

11. Claims 13 and 14 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. The receiver merely receives data

Art Unit: 2134

and compares derived values. There is no result from the comparison or the claimed operations.

***Claim Rejections - 35 USC § 102***

12. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

13. Claims 13 and 14, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al., USPN 5,694,471.

With regard to claim 13, Chen discloses a receiver for receiving data (column 9 lines 42-49) including, means for deriving a first reference value from the received data (issuer data, column 9 lines 50-55), means for calculating an error check value from the received data (another checksum, column 9 lines 64-67), means for deriving an authentication value for the received data (composite, column 9 lines 56-62), means for calculating a second reference value (recovered checksum, column 9 lines 62-64) at least partly based on the authentication value and the first reference value (issuer data), and means for comparing the second reference value with the error check value (column 10 lines 2-11).

With regard to claim 14, Chen discloses performing an XOR function (column 9 lines 62-64).
